

MoCOOL **Radiator Additive**

MoCOOL® is a radiator additive which will reduce cooling system temperature by as much as 15°C (30°F).

This performance additive offers better heat transfer than normal coolants. The unique formula also contains rust and corrosion inhibitors.

*** Design to be used with pure water at a dilution of 5% (20:1) (for competition use where monoethyleneglycol is not allowed) or mix with your coolant at 5% of volume.**

*** Designed for aluminium, cast iron, copper, brass and bronze systems.**

MoCOOL® is compatible with antifreezes, including the new long-life versions.

Code: 847405
